Installation for the dox42 Office Add-Ins

Save the dox42 AD files to a fixed directory on the computer, on which you want to use dox42. The files will not be copied during installation and need to remain on the selected path.

Start Word/Excel/PowerPoint, activate the dox42-Ribbon and select "Data Map".

	2	-		-	•		42	<i>P</i>
Generate	Reload	Automate	Dynamic	Insert	Data	Help +	dox42.com	Activate
	Text Blocks	Range	Column	Data Field	Map	Samples		
		Automate		Data	a		Connect	

In the Data Map Designer select "Data Map". Open the File-Menu and select "Custom Datasources".

Í						Data Ma	ap Designer
	File						
		New	,	ii	XML	*	
		Open	ice rce Ins	SharePoint Data Source sert	XML Data Source	SAP Data Source	Define Text Block Directory
	H	Save					
		Save As					
		Link Data Map to Document					
	2	Custom Datasources					
		Close					

In the dialog **"Register Custom Datasources"**, you can import the Import Configuration **(ADDataSouceImport.config).** This way, the configuration will be defined in the Custom Data Source.

а ^к	Register Custom Datasources						
[Import]				
[Friendly Name	Client Assembly Path	Server Assembly Path	ParserStrategy Classname	Creator	lcon
		AD Data Source	C:\dox42\dox42ADDataSource\ADConfigDialog.dll	C:\dox42\dox42ADDataSource\ADD	ADDataEngine.ADDataSourceParser	dox42	C:\dox42
	**						
	<						>
					🖌 ОК	XC	ancel

Now, the Custom Data Source is ready for use as any other dox42 Data Source.

Installation for the dox42 Server

In order to use the Custom AD Data Source on the dox42 Server, please copy the following Assemblies in the /Bin directory on your dox42 Server:

✓ ADDataEngine.dll

Now the Custom AD Data Source has to be registered in the web.config of your server.

<customDataSources>

```
<add key="ADDataEngine.ADDataSourceParser"
value="AD Datenquelle;C:\dox42Server\bin\ADDataEngine.dll"/>
```

</customDataSources>

For further details also take a look at the dox42 Server Documentation that you can find on the dox42 Server Site: www.dox42.com/dox42Server.aspx.

Data integration with dox42 Active Directory Data Source

Connection Query	
Domain:	ad yoursite.com
Username:	Administrator
Password:	••••••

To connect to your Active Directory please insert Domain, Username and Password.

After establishing the connection you can choose the Name and the Property Name(s) that you want to import into dox42. The Data Field Name will be shown in the "Insert Data Field" dialog.
